PRODUCT AND DATA MANAGEMENT IN THE TECHNOLOGY MARKET

Professional with experience in product management, data, and automation, working in technology and innovation companies with a focus on operational efficiency, scalability, and value generation.

Professional Summary

- Career in product and data management, working in technology and innovation companies, leading multidisciplinary teams and delivering solutions with high operational and financial impact.
- Experience in developing and managing digital platforms, APIs, and automation systems, bridging business vision and technical depth in Python, BigQuery, and data tools.
- Experience in high-complexity and large-scale environments, managing financial risks exceeding R\$ 8 million monthly and generating incremental revenue of up to R\$ 2 million in single campaigns.
- Expertise in data science and analytics, developing predictive models, churn analysis, product correlation, and generating qualified leads for sales teams.
- Analytical profile, data-oriented and focused on results, with the ability to navigate between technical and business areas in dynamic and fast-growing environments.

Professional Experience

MOTTU

(MAR/2025 – Present)

○ PRODUCT MANAGER – FINES (JAN/2026 – PRESENT)

- Leadership of a multidisciplinary operations and technology team, managing products and processes related to the mitigation of financial risks from traffic fines in motorcycle rentals.
- Management of operations with exposure exceeding R\$ 8 million per month, utilizing technology, data, and automation to mitigate approximately 99% of operational risks.
- Definition of strategic indicators, KPI monitoring, prioritization of systemic improvements, and continuous evolution of a robust fine management platform, ensuring scalability and operational efficiency.

○ TRAINEE (MAR/2025 – MAY/2026)

- End-to-end development of a motorcycle dispatch system from the factory in Manaus, integrating distribution logistics for branches across Brazil.
- Creation of APIs and flows for capturing invoices and operational data, in addition to data validation, treatment, logistical planning, and integration with other systems.

GRUPO FLEURY

(FEB/2024 – DEC/2024)

○ DATA SCIENCE INTERN – PRICING

- Implementation of data analysis and data science to provide strategic support to the sales team, focusing on identifying opportunities and generating qualified leads.
- Development of product correlation, mix, and churn analyses, generating up to R\$ 2 million in additional revenue in a single campaign.

PROMAD JR. – CONSULTING AND PROJECTS

(JUN/2022 – DEC/2023)

○ PROJECT DIRECTOR (JAN/2023 – DEC/2023)

- Planning and coordination of strategies for the Junior Enterprise, boosting the average ticket of projects and ensuring the achievement of goals.

○ PROJECT MEMBER (JUN/2022 – DEC/2022)

- Acted in the Projects Department, contributing to the development and execution of consulting projects.

PETROBRAS / FDTE

(JAN/2020 – JUN/2022)

○ SCHOLARSHIP RESEARCHER

- Development of software for optimizing inspection processes for subsea equipment (RBI Project – Petrobras/LabRisco-EP USP/FDTE).
- Utilized Java for data collection and Python with neural networks for optimizing maintenance plans.

Education and Additional Information

- ✓ Bachelor's Degree in Production Engineering – UNESP – São Paulo State University (2019 – 2024)
- Research Member of the Computer Simulation and Modeling Group (CNPq/UNESP) (2021 – 2022)
- English: Native
